

**Length** Measure your dog's length by placing the tape measure at the base of their tail (where the tail meets the body, not the end of the tail) to the base of their neck. Measure along the spine on top of their back to get the most accurate reading.

**Chest** Measure your dog's chest by wrapping the tape measure around the widest part of their rib cage.

**Neck** Measure your dog's neck by wrapping the tape measure around the widest part of the neck.
